

CERTIFICATION OF HOT WATER HEATING SYSTEM DESIGN
(Completion Letter)

Manager, Building Division
City of Surrey
13450 – 104 Avenue
Surrey, BC
V3T 1V8

Dear Sir:

Re: Proposed Dwelling at _____

This is to certify that the installation of the hot water heating system for the dwelling located at the above noted property has been designed and installed in compliance with Section 9.33 of the current B.C. Building Code.

- Specifically, the design, construction and installation conform to good engineering practice.
- All control equipment, component parts and systems are installed to provide easy access for inspection, maintenance and cleaning.
- All systems and respective thermostats are operational and functioning in good working order.
- The system is capable of maintaining an indoor air temperature of 22° centigrade at the outside winter design temperature as described in Article 9.33 of the current B.C. Building Code.
