

NO: R062

COUNCIL DATE: March 28, 2022

REGULAR COUNCIL

TO: **Mayor & Council**

DATE: **March 24, 2022**

FROM: **City Manager**

FILE: **7130-16**

SUBJECT: **COVID-19: Emergency Operations Centre Update**

RECOMMENDATION

The City Manager recommends that Council receive this report for information.

INTENT

The purpose of this report is to provide Council with a status update of the various actions taken in response to COVID-19 since the last Corporate Report, which was provided to Council at the February 14, 2022, Regular Council Public Hearing meeting (a copy of Corporate Report No. R038; 2022 is attached as Appendix "I").

BACKGROUND

The City's Emergency Operations Centre ("EOC") is the command and communications hub for any large emergency or disaster including the current global COVID-19 pandemic. The EOC was activated by the City on February 17, 2020, prior to the World Health Organization ("WHO") declaring a global pandemic. Since the last report, the COVID-19 situation has improved in BC resulting in many BC Public Health Order restrictions being removed effective March 11, 2022. As a result, the EOC has undertaken the following actions:

- Adjusted the COVID-19 Compliance and Enforcement Team ("CCET") to a response-based model for complaints;
- Increased capacity for in-office staff to 100% following the suggestion of the Provincial Health Officer;
- Continued the enforcement of vaccine passport entrance requirements at all recreation facilities until April 8, 2022;
- Updated COVID-19 communication signage at City facilities to reflect changes to provincial health orders;
- Planned for the suspension of the City's Employee, Volunteer and Contractor COVID-19 Vaccination Policy and Rapid Testing Program after the April 8, 2022 announcements; and

- Continued social media efforts to remind residents and businesses of the need to adhere to public health measures and good practices, to advise residents of vaccine eligibility and opportunities, and to advise of facility and service updates enacted as part of Step 3 of the Surrey Restart Plan.

DISCUSSION

The EOC has clear responsibilities outlined and actions underway to respond to the immediate impacts of the COVID-19 pandemic. As the COVID-19 situation continues to evolve, the EOC continues to plan, assess, and respond to new developments domestically and abroad.

Current State of COVID-19

COVID-19 continues to have a global impact with over 475 million cases worldwide as of March 23, 2022. The Omicron wave, which had led to significant case counts in North America, has subsided and now most of the case growth is concentrated in Europe and East Asia. In response to lowering case counts, jurisdictions in North America, including Canada, have begun removing COVID-19 restrictions that have been in place for nearly two years.

British Columbia added an additional 1,723 cases from March 6-12, 2022 (the last date of reporting by the Province) for a total of 352,682 cases. This represents a decrease of over 703 cases from the preceding week. The BC Centres for Disease Control (“BCCDC”) has indicated that case numbers are no longer an effective measure for COVID-19 transmissibility and will no longer be updating these figures in the near future. A summary of COVID-19 cases within the Metro Vancouver region is included in Appendix “II”.

Recent Updates to BC Public Health Orders

British Columbia’s Provincial Health Officer announced on March 11, 2022, the lifting of COVID-19 restrictions in response to declining case counts across the province. These changes include:

- Face coverings will be optional for people in all indoor public and workplace settings;
- Removal of capacity limits on personal and organized indoor gatherings;
- Removal of capacity limits for events, nightclubs, bars, and restaurants;
- Resumption of indoor and outdoor fitness aquatics, and rinks;
- Resumption of adult sports tournaments; and
- Return to work for remote office workers with COVID-19 safety protocols.

Additionally, effective April 8, 2022, the following changes will also be made to the public health order:

- BC Vaccination Card proof of vaccination to access non-essential events, services, and businesses will no longer be required; and
- All Workplace Safety Orders will be lifted.

In response to the current COVID-19 situation and the most recent PHO updates, the City is using its Restart Plan to determine when each of the City's other functional business areas are able to adjust their level of service and resume some form of operation. These decisions are based on the premise that all of the following four criteria are met:

1. Ability to comply with new PHOs;
2. Reasonable public demand for services;
3. Financial viability; and
4. Public and employee safety measures are in place.

The following sections provide an update on the status of the EOC's COVID-19 response to changes with the latest PHOs and the City's Restart Plan.

Current Staffing Levels and Return to Office Plan

Since November 29, 2021, there has been 857 cases amongst staff, with a drastic decline in reported cases in recent weeks. The RTO plan and safe work protocols in place have been effective to date in minimizing COVID-19 transmission between staff as most cases that staff have contracted occurred outside of the workplace. Despite the number of cases amongst staff, the City's level of service has not been negatively impacted.

In response to the recent changes to the PHOs, effective March 14, 2022, staffing levels were increased to 100% and all in-person meetings and training sessions have returned to 100% room capacity.

Effective April 8, 2022, proof of vaccination will not be required to enter any City facility and greeters will no longer be required at facility entrances for this purpose. Furthermore, the City's Rapid Testing Program will be suspended for staff (excluding those who work in RCMP Support Services) and those participating in the program will no longer be required to submit a valid negative rapid test prior to their shift.

Surrey Fire Services and Surrey RCMP Response

The Surrey Fire Services ("SFS") and RCMP have generally responded to more calls than pre-pandemic levels, including in the previous month. Since the beginning of January 2022, Surrey Fire Service workload trends continue to be 43% higher in-service demand compared to 2021 year-to-date ("YTD") (see Appendix "III").

Surrey RCMP calls for service in 2022 YTD has exceeded pre-pandemic levels; however, Surrey RCMP has responded to 191 fewer calls compared to 2021 (see Appendix "IV").

COVID-19 Compliance and Enforcement Team

On March 26, 2020, the Surrey RCMP and the City of Surrey Bylaw Services Division established a joint COVID-19 Compliance & Enforcement Team (“CCET”) to conduct proactive checks and educate local residents and businesses on their personal obligations related to PHOs.

Since the last report, CCET has received a total of only six complaints regarding non-compliance. With the easing of PHOs, and given the sustained high-level of compliance amongst businesses, CCET will be moving towards a response-base model for complaints.

Surrey Libraries

All 10 Surrey Libraries are open at full-service hours with daily checkouts at 75.5% of pre-pandemic levels and daily visits at 49.7% of pre-pandemic levels. In addition, in-person programming restarted with the easing of provincial health restrictions effective February 17, 2022, and public meeting room rentals are now available at select branches. Libraries are also continuing to be used by the community for information and recreational needs, computer access, and study spaces.

Parks, Recreation & Culture Facilities

The City initiated a phased reopening of Parks, Recreation & Culture facilities across the City for pre-registered programs starting in May of 2020. Given the new PHOs, all Parks, Recreation & Culture programs can continue to expand and return to pre-pandemic levels based on community demand. The following chart reflects the status of facilities reopened to date:

| Facility Type | Number of Facilities Opened | Number of Facilities Closed | % of Regular Program Offering at Opened Facilities |
|--------------------------|-----------------------------|-----------------------------|--|
| <i>Recreation Centre</i> | 13 | 0 | 60-70% |
| <i>Arena</i> | 5 | 0 | 70-80% |
| <i>Indoor Pool</i> | 4* | 1 | 50-70% |
| <i>Cultural Centres</i> | 5 | 0 | 75-90% |

* The Newton Wave Pool will reopen on March 29, 2022.

The City continues to monitor changes in demand and facility usage to inform its decision on how to adjust the levels and types of services offered and to align with PHOs. This continues the well-founded nature of the City’s reopening strategy and highlights the need to closely monitor actual demand once facilities reopen. The demand for recreational services and in particular swimming and skating lessons is higher than operational staffing capacity can meet. Registration is continuing to experience longer than normal wait call times and the City is incurring large waitlists for in demand programs. Parks, Recreation & Culture and Human Resources staff are focusing on recruiting, hiring and training of new staff to increase the staffing capacities to meet these demands for service.

Support for Priority Populations

The EOC has worked with BC Housing and the Fraser Health Authority to open one arena at North Surrey Recreation Centre (“NSRC”) as an Emergency Response Centre (“ERC”) to prevent the spread of COVID-19 among people experiencing housing instability during the pandemic. The arena has operated at or near capacity since opening.

To reduce the number of people in some existing BC Housing funded shelters in Surrey, BC Housing has moved people from shelters to individual motel rooms at the Linda Vista Motel at 6498 King George Boulevard and the Canadian Inn at 6528 King George Boulevard.

It is expected that as the risk for COVID-19 subsides, BC Housing will seek to relocate those sheltered at the Linda Vista Motel and the Canadian Inn to available housing where possible, or back to an existing shelter as capacity in these facilities increase back to pre-pandemic occupancy rates. In addition, staff are continuing to work with BC Housing and the Province to identify alternate housing options for the guests at the NSRC ERC.

Supporting and Informing Residents

The City continues to provide updates regarding COVID-19 through a variety of mediums specifically the www.surrey.ca/COVID-19 website. This has been a valued source of information for residents and businesses with approximately 317,346 pageviews as of March 14, 2022, with 601 pageviews occurring over the last week.

Additionally, the City’s social media accounts including Facebook, Twitter, and Instagram continue to be a valued source of information for residents and businesses. Over the past week, the City has used these platforms as part of a renewed effort to encourage residents to follow current regulations and restrictions. Through these platforms, the City reached approximately 119,992 users over the last week.

COVID-19 Financial Recoveries

Since the beginning of the pandemic, the City has requested \$2,569,835 and has been approved \$1,203,090 in funding from Emergency Response from Emergency Management BC (“EMBC”) in recoveries and the Federal Government in grants. Funds from EMBC are reimbursed on an expense authorization basis with some recoveries based on utilization of PPE for COVID-19 response.

The following chart provides a summary of the amounts requested and approved to date:

| COVID-19 Emergency Response | | | |
|---|---|----------------------------------|---------------------------------|
| Entity | Recovery Program/Purpose | Recovery Amount Requested | Recovery Amount Approved |
| Emergency Management BC (EMBC) | COVID-19 Pandemic | \$553,034 | \$322,087 |
| Federal Government (Luma Native BC Housing Society) | Reaching Home COVID-19 Canada's Homelessness Strategy | \$2,016,801 | \$881,003 |
| TOTAL | | \$2,569,835 | \$1,203,090 |

SUSTAINABILITY CONSIDERATIONS

The City of Surrey Emergency Program, the EOC, and the level of service provisions support the objectives of the City's Sustainability Charter 2.0. This work relates to Sustainability Charter 2.0 themes of Public Safety, specifically, the following Desired Outcome ("DO"):

- Emergency Preparedness and Prevention DO6: Surrey has proactive and coordinated emergency prevention measures in place and can effectively deal with emergencies that arise.

CONCLUSION

The impact of the COVID-19 pandemic has greatly improved in recent weeks with many Public Health Order restrictions being lifted. As a result, the EOC will continue adjusting its COVID-19 response according to the latest PHOs and the City's Restart Plan.

CORPORATE REPORT

NO: R038

COUNCIL DATE: February 14, 2022

REGULAR COUNCIL

TO: Mayor & Council

DATE: February 14, 2022

FROM: City Manager

FILE: 7130-16

SUBJECT: COVID-19: Emergency Operations Centre Update

RECOMMENDATION

The City Manager recommends that Council receive this report for information.

INTENT

The purpose of this report is to provide Council a status update of various actions taken in response to COVID-19 since the last Corporate Report which was provided to Council at the January 17, 2022 Regular Council Public Hearing meeting (a copy of Corporate Report No. R012; 2022 is attached as Appendix "I").

BACKGROUND

The City's Emergency Operations Centre ("EOC") is the command and communications hub for any large emergency or disaster including the current global COVID-19 pandemic. The EOC was activated by the City on February 17, 2020, prior to the World Health Organization ("WHO") declaring a global pandemic. Currently BC has entered the "fifth wave" of COVID-19, and as such the EOC has undertaken the following actions:

- Continued Step 3 of the Surrey Restart Plan and commenced preparations to introduce further changes to facilities and services as part of Step 4 of the Surrey Restart Plan (which has since been put on hold);
- Continued enforcing vaccine passport entrance requirements at all recreation facilities;
- Continued screening of staff entering the workplace with a daily health check that they must complete remotely before arriving at the workplace, following the directions announced by the Provincial Health Officer on November 7, 2020 that requires all businesses and worksites to conduct active daily in-person screening of all onsite workers using a COVID-19 symptom check list;
- Implemented a proof of vaccination and rapid test submission system to support the City's Employee, Contractor and Volunteer COVID-19 Vaccination Policy;

- In response to the emergence of a new variant of concern, Omicron, a review of the level of service/reopening/closing decision matrix has been initiated to ensure that the key considerations of the decision matrix are still valid;
- Amended the City's COVID-19 Symptoms and Close Contact Protocols in response to the shorter incubation period of the Omicron variant; and
- Continued social media efforts to remind residents and business for the need adhere to public health measures and good practices, to advise residents of vaccine eligibility and opportunities and to advise of facility and service updates enacted as part of Step 3 of the Surrey Restart Plan.

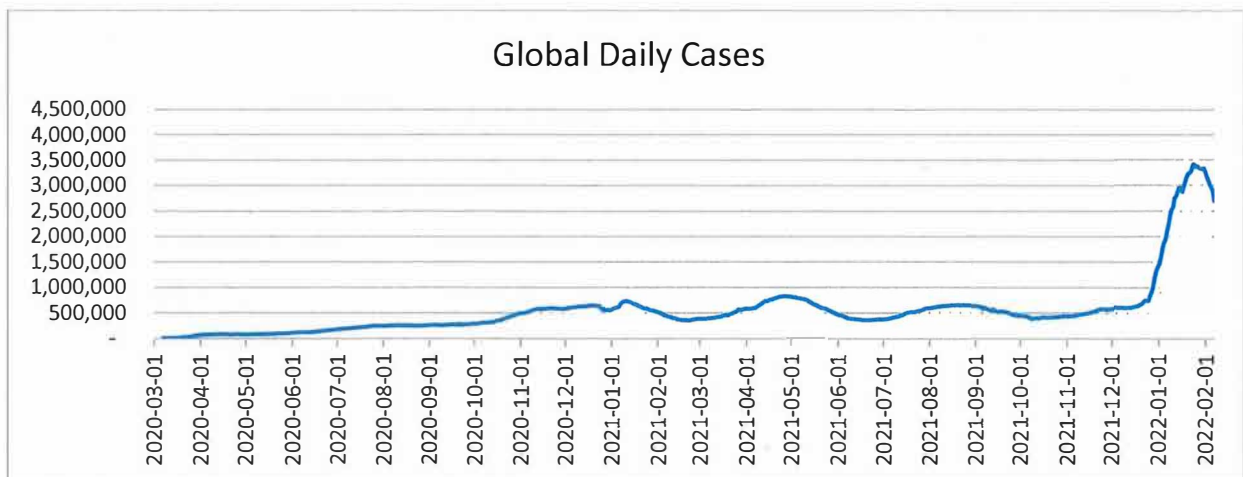

DISCUSSION

The EOC has clear responsibilities outlined and actions underway to respond to the immediate impacts of the COVID-19 pandemic. The EOC is continuing to utilize Surrey's Proactive 10-Point Action Plan to mitigate impacts of the COVID-19 pandemic that moves the EOC beyond immediate response to consider the medium- and longer-term impacts of the pandemic on City operations and enables tracking of key data indicators that will assist with forecasting and preparing for recovery and return to business-as-usual operations over time.

Key insights since the last COVID-19: Emergency Operations Centre Update include:

Global

- Global COVID-19 cases continue to rise, with 400.7 million cases as of February 9, 2022. This represents a 27.4% increase (86.2 million cases) in infections reported;

- There are two countries with over 30 million infections reported (United States and India), two countries with over 20 million infections reported (Brazil and France), and 48 countries with over 1 million infections reported (United Kingdom, Russia, Turkey, Argentina, Iran, Columbia, Spain, Italy, Indonesia, Germany, Mexico, Poland, South Africa, Ukraine, Peru, Philippines, Netherlands, Iraq, Malaysia, Czechia, Chile, Japan, Canada, Bangladesh, Thailand, Belgium, Pakistan, Sweden, Israel, Romania, Portugal, Kazakhstan, Colombia, Serbia, Vietnam, Slovakia, Austria, Hungary, Switzerland, Greece,

Jordan, Australia, Bulgaria, Cuba, Denmark, Georgia, Ireland, South Korea, and Morocco). The infections in these 52 countries account for 90.1% of total infections reported;

United States

- As of February 9, 2022 the United States has had approximately 77,051,506 cases. This represents a 23.2% increase (14,505,665 cases) in infections reported since January 12, 2022;
- Three states (California, Florida, Texas) are reporting over 5 million infections, one state (New York) is reporting over 4 million infections, seven states (North Carolina, New Jersey, Michigan, Illinois, Pennsylvania, Ohio, and Georgia) are reporting over 2 million infections, and fifteen states (Arizona, Tennessee, Indiana, Massachusetts, Virginia, Wisconsin, Missouri, Minnesota, South Carolina, Kentucky, Alabama, Oklahoma, Louisiana, Washington and Colorado) are reporting over 1 million infections;

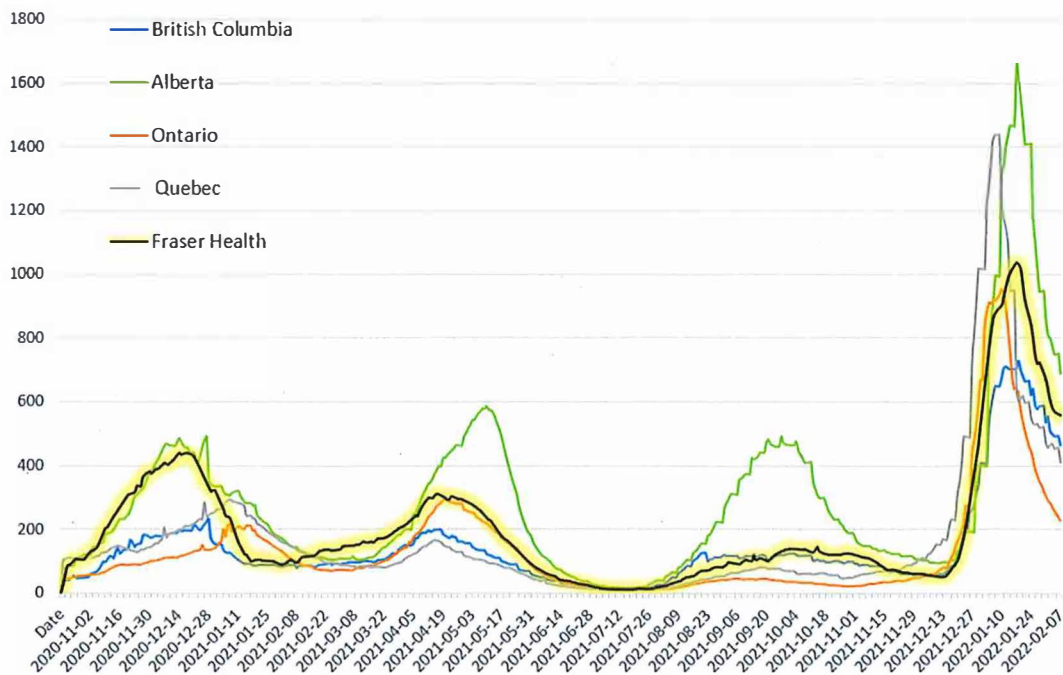

Canada

- As of February 9, 2022, Canada has had approximately 3,152,611 cases. This represents a 19.7% increase (518,638 cases) in infections reported since January 12, 2022;

British Columbia, Fraser Health Authority and Surrey

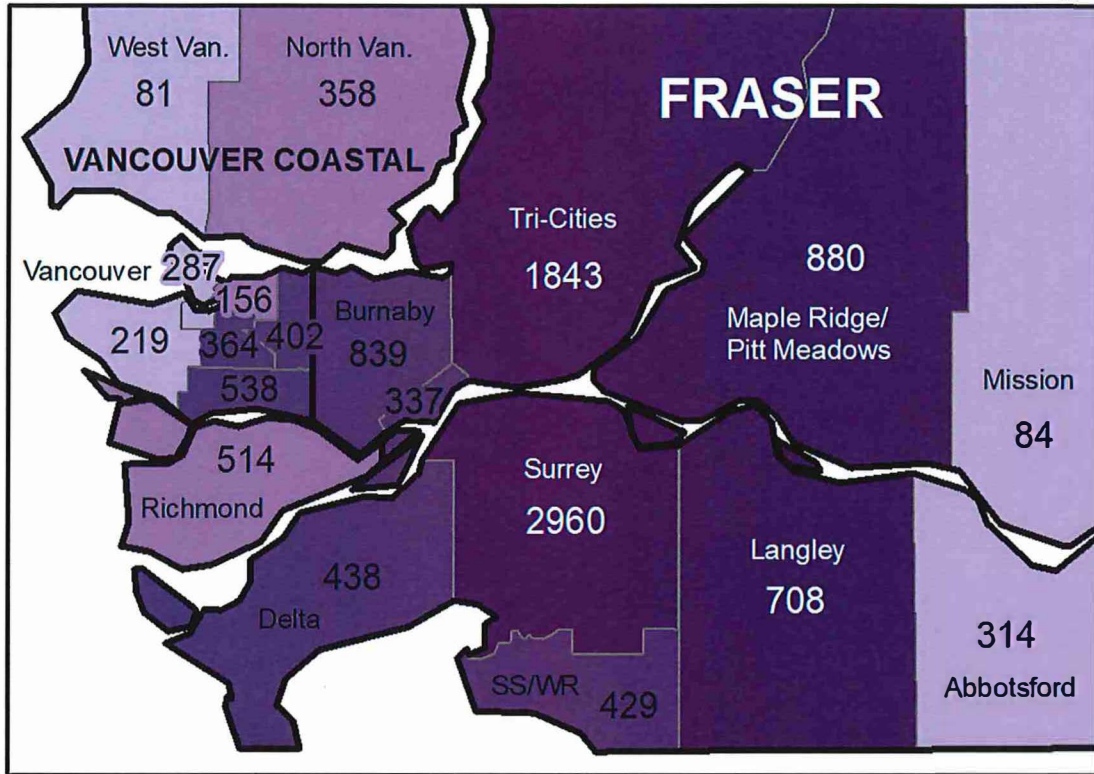

- As of February 9, 2022, BC has had 335,042 confirmed cases. This represents a 17.1% increase (48,962 cases) in infections reported since January 12, 2022;
- Of the 335,042 confirmed cases in BC, the Fraser Health Authority continues to account for the majority of confirmed cases (154,095 or 46.0%). Of the cases in the Fraser Health region 143,133 have recovered, 346 are currently hospitalized (58 in critical care) and 1,251 have died;

Daily Active Cases per 100,000 Population

Source: BCCDC, Johns Hopkins University Coronavirus Research Center, 2022

- From January 23 to January 29, 2022, the latest date of infection information by community, there were 4,827 confirmed cases in the lower mainland, and of those, 1,211 (25%) confirmed cases in Surrey and White Rock;

Source: <http://www.bccdc.ca/health-info/diseases-conditions/covid-19/data>

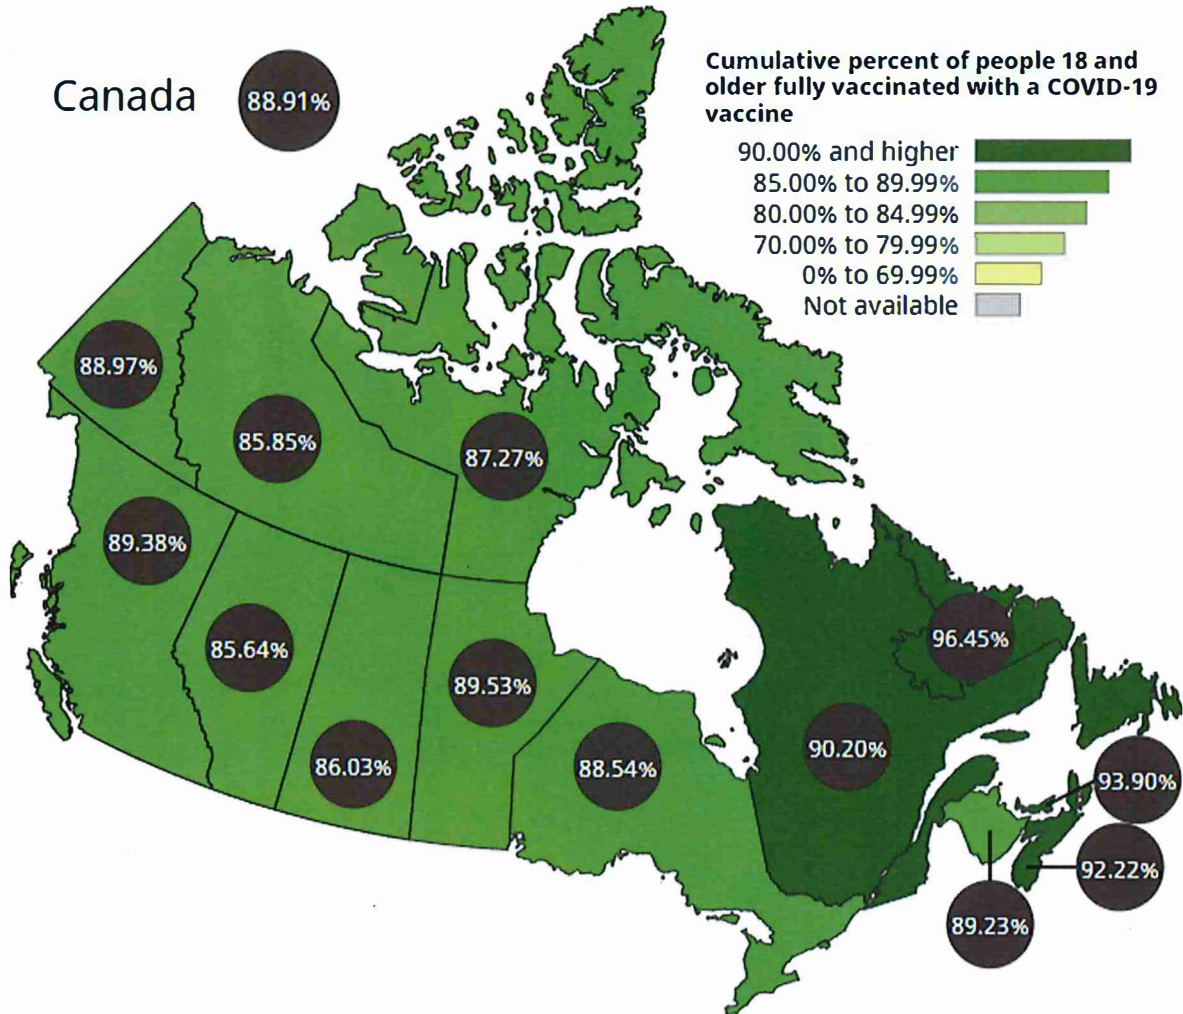

- From January 3, 2021 to January 29, 2022, there were 42,669 cases reported in Surrey and White Rock. A summary of the number of confirmed cases each week in Surrey and White Rock, as well as the Fraser Health Authority and Vancouver Coastal Health is provided in Appendix "II". A comparison of the number of confirmed cases per capita in communities of the Fraser Health Authority and Vancouver Coastal Health is provided in Appendix "III". As illustrated, the number of new cases per week in Surrey and White Rock has decreased from the previous peak corresponding to the Omicron variant; and
- The Province started vaccinations on December 15, 2020. As of February 9, 2022, 4,471,761 first doses have been administered, which is an increase of 61,135 doses being administered. In addition, 4,198,814 second doses have also been administered, which is an increase of 69,795 second doses being administered.
- Fraser Health has not updated their information on schools with a COVID-19 outbreak since January 7, 2022.

COVID-19 Vaccination Rates

According to the latest data from the BCCDC, the COVID-19 vaccines have been proven to significantly reduce rates of hospitalization and death caused by COVID-19, including the delta variant. As of February 9, 2022, more than 10.1 billion doses of vaccine have been administered in more than 160 countries. Canada has the 18th highest per capita vaccination rate in the world and

over 79 million doses have been administered across the country since vaccinations began in December of 2020. In British Columbia, 10,993,192 doses have been administered, and approximately 84% of the province has received at least one dose, 78% has received two doses, and 39% has received a third vaccine dose.

At the municipal level, Surrey has very high vaccination coverage rates with 95% of the population aged 18+ receiving two doses. This is slightly higher than the provincial and national coverage rates of 89.38% and 88.91%, respectively, as shown in the following diagram.

Source: <https://health-infobase.canada.ca/covid-19/vaccination-coverage/>

In October, 2021, the Federal and Provincial governments implemented mandatory vaccine policies affecting federally regulated industries and BC public service employees. Provincial crown corporations and other government-related entities have also been encouraged to implement mandatory vaccine policies. The Province began vaccinating children between the ages of 5-11 on November 29, 2021 following approval from Health Canada.

COVID-19 Fifth Wave and Variants of Concern (“VOC”s)

In mid- November, South Africa reported the detection of a new variant of concern, Omicron, which has resulted in many governments re-imposing travel restrictions or re-evaluating their COVID-19 response. Canada has instituted travel bans for countries in Africa and has asked the National Advisory Committee on Vaccination (“NACI”) to provide new recommendations on the need for a third dose booster shot. In British Columbia, the first confirmed case of the Omicron variant of COVID-19 was detected in British Columbia on November 30, 2021 in the Fraser Health Authority.

From January 8, 2022, to February 8, 2022, the Province added 113,029 new cases of COVID-19, an increase of more than 75,000 from the previous month, the majority of which were the Omicron variant. On December 22, 2021, the Province announced new Public Health Orders to limit the spread of the Omicron variant in British Columbia. These restrictions include:

- No organized indoor social events and gatherings of any size;
- Concerts, sports games and theatres reduced to 50% seated capacity, regardless of venue size;
- Closing gyms, fitness centres and dance studios;
- Closing bars and nightclubs; and
- Limiting table sizes at restaurants, cafes and pubs to a maximum of six people per table with physical distancing or barriers.

Additionally, the Province announced on Wednesday, December 29, 2021 that the full return to school for students in kindergarten to Grade 12 would be delayed until Monday, January 10, 2022.

On January 28, 2022, the Province announced the official removal of restrictions on individual or group fitness, exercise, and dance exercise effective January 20, 2022. Further, youth sport tournaments were permitted to resume effective February 1, 2022. The BC Vaccine Card program will remain in effect until June 30, 2022 unless otherwise extended or stopped.

While there remains a strong presence of the Omicron variant in British Columbia, data provided by the BCCDC indicates that the peak of case growth was reached in mid-January, 2022. From February 1 to February 8, 2022, BC added 9,191 cases of COVID-19, a reduction of more than 5,500 new cases from the previous week. This rapid deceleration of case growth has been seen in jurisdictions around the world, where total new cases have decreased by more than 50% of the previous peak in the United States, United Kingdom, and other European countries.

Across Canada and the United States, the slowing of case growth has led to the removal of restrictions that have been in place prior to the Omicron wave. In Canada, Alberta (effective immediately) and Saskatchewan (effective February 14) announced the termination of the vaccine card policies and intention to remove all COVID-19 restrictions. BC Public Health Officials have stated tentative plans to update PHOs following Family Day.

Preliminary data from other jurisdictions around the world suggests that infections from the Omicron variant of COVID-19 are less severe and less likely to require hospitalizations than previous variants. Despite this, due to the significant volume of case growth in British Columbia, hospitalizations and deaths have risen. The Omicron Variant has shown increased infectiousness among those with two doses of a COVID-19 Vaccine as compared to earlier variants. Per capita

growth in infections remains primarily among those that are unvaccinated. Evidence has shown that those fully vaccinated are less likely to develop serious illness and become hospitalized.

BC's Restart Plan

On May 25, 2021, following a continued reduction in the number of new cases combined with an increased number of British Columbians being vaccinated, the Province outlined their four-step reopening plan.

On July 1, 2021 as there was at least 70% of the provincial adult population with dose 1, cases declining and hospitalizations declining, the Province enacted Step 3 of the BC Restart Plan. This Step 3 permitted:

- Provincial state of emergency and public health emergency lifted;
- Returning to usual for indoor and outdoor personal gatherings;
- Increased capacity for indoor and outdoor organized gatherings, with safety plans;
- Nightclubs and casinos reopened with capacity limits and safety plans; and
- New public health and workplace guidance around personal protective equipment, physical distancing, and business protocols.

Step 4: Future (Implementation date has yet to be determined; Eligibility Requirements: more than 70% of adult population with Dose 1, cases low and stable (contained clusters) and hospitalizations low):

- Returning to normal social contact;
- Increased capacity at larger organized gatherings;
- No limits on indoor and outdoor spectators at sports; and
- Businesses operating with new safety plans.

The Province has yet to indicate a date for the implementation of Step 4.

Surrey Restart Plan

The EOC's opening decision matrix, which is used to determine when each of the City's functional business areas are able to adjust their level of service and resume some form of operation, is based on the premise that all of the following four criteria are met:

1. Ability to comply with new Provincial Health Order(s) ("PHOs");
2. Reasonable public demand for services;
3. Financial viability; and
4. Public and employee safety measures are in place.

In response to the four-step BC Restart Plan, the EOC has used the opening decision matrix to prepare the Surrey Restart Plan which outlines what changes will be made to facilities and services with Step 2, 3 and 4 of the BC Restart Plan.

In response to the new variant, the EOC has reviewed the City's level of service/reopening/closing decision matrix to ensure that the key considerations of the decision matrix are still valid/appropriate.

Parks, Recreation & Culture Facilities

The City initiated a phased reopening of parks, recreation and culture facilities across the City for pre-registered programs starting in May of 2020. The following chart reflects the status of facilities reopened to date:

| Facility Type | Number of Facilities Opened | Number of Facilities Closed | % of Regular Program Offering at Opened Facilities |
|---------------------------------|------------------------------------|------------------------------------|---|
| <i>Recreation Centre</i> | 13 | 0 | 40-60% |
| <i>Arena</i> | 5 | 0 | 40-60% |
| <i>Indoor Pool</i> | 3 | 2 | 40-60% |
| <i>Cultural Centres</i> | 5 | 0 | 50-60% |

Program spaces and capacities are based on the required two-metre physical distancing for static activities and three to four metre distancing for more active programming. Schedules also consider enhanced cleaning and disinfecting requirements to ensure adequate cleaning between each session. Staff are working closely with Fraser Health and other authorities on additional approval processes to continue to resume services and reopen facilities in a safe manner. At this time, masks are required in all Civic facilities.

The City continues to monitor changes in demand and facility usage to inform its decision on how to adjust level and type of services offered and to align with PHO. This continues the well-founded nature of the City's reopening strategy and highlights the need to closely monitor actual demand once facilities reopen.

Public Health Order Updates

The City implemented the Vaccine Passport program throughout all recreation facilities on September 13, 2021. To improve customer experience, the Parks, Recreation and Culture Department are utilizing the Department's registration system to house the vaccine information for patrons that have completed a consent form. This has helped to improve customer service by alleviating unnecessary congestion and waiting times for participants.

On December 22, 2021, the Provincial Health Order established the following restrictions set to last until January 18, 2022:

- All gymnasiums, weight rooms, fitness classes and aquafit classes will be suspended.
- Indoor gatherings for rentals of any size are cancelled.
- Spectators are reduced to 50% capacity.
- Indoor pool capacity reduced to a maximum of 200 people.
- Passive seniors' programs will run at 50% capacity.
- All in-pool activities now require POV.

On January 18, 2022, the Provincial Health Order established that all weight rooms can reopen January 20 and all gymnasiums, fitness and aquafit classes can reopen as of January 24, 2022.

Recreation Programs & Services

The program utilization for the period of January 23 – February 5, 2022, is summarized below:

| | Drop-in and Membership Scans (Visits Represented Through Scan and Point Of Sale Data) | |
|-----------------------------|---|-------------|
| | Aquatics and Fitness | Arenas |
| | # Of Visits | # Of Visits |
| Jan 30 – Feb 5 | 10,208 | 360 |
| Jan 23 – Jan 29 | 9,646 | 417 |
| Since Restart (Aug 3, 2021) | 432,620 | 13,469 |

| | Registered Programs and Early Registered Drop-in | | | | | | | | |
|-----------------|--|--|--------|-----------------|--|--------|-----------------|--|--------|
| | Aquatics | | | Arenas | | | Indoor Fitness | | |
| | New Registrants | New Registration Opportunities Available | Fill % | New Registrants | New Registration Opportunities Available | Fill % | New Registrants | New Registration Opportunities Available | Fill % |
| Jan 30 – Feb 5 | 565 | 678 | 83% | 1392 | 4396 | 32% | 12,109 | 15,047 | 80% |
| Jan 23 – Jan 29 | 462 | 616 | 75% | 968 | 3,776 | 26% | 10,829 | 14,360 | 75% |
| Since Reopening | 102,857 | 124,939 | 83% | 29,376 | 51,776 | 56% | 302,484 | 459,858 | 66% |

| | Registered Programs | | | | | |
|-----------------|---------------------|----------------------------|--------|---------------------|----------------------------|--------|
| | Preschool | | | Before & After Care | | |
| | Current Registrants | Registered Spots Available | Fill % | Current Registrants | Registered Spots Available | Fill % |
| Jan 30 – Feb 5 | 1086 | 1,234 | 88% | 1,471 | 2,369 | 62% |
| Jan 23 – Jan 29 | 1085 | 1,235 | 88% | 1,502 | 2,405 | 62% |

Aquatics

Three of the City’s aquatic facilities are open, the Surrey Sport and Leisure Complex, the Grandview Heights Aquatic Centre, and Guildford Recreation Centre Aquatics and are currently operating with modified hours of operations due to staff shortages.

All facilities are operating with COVID-19 safety protocols in place to protect staff and users. Safety planning has been completed with guidance from the BC & Yukon Lifesaving

Society, Fraser Health and the British Columbia Recreation and Parks Association. The facilities are serving a broad range of users including lane swimming, public swimming, learn to swim lessons and aquatic sport rentals. Since opening, these facilities have safely served more than 535,477 public users (including fitness) and provide homes for the City’s aquatic sport teams to continue with athlete development. Active recruitment and training is underway to ensure sufficient aquatic staff levels to enable additional aquatic facilities to be reopened.

The Newton Wave Pool will reopen on March 29, 2022.

Sport User Group utilization for the period of January 23 – February 5, 2022 is summarized below:

| Aquatics User Group Stats | | | |
|---|--------------------|-----------------------|--------|

Arenas

The arenas have opened all locations including South Surrey Arena, Surrey Sport and Leisure Complex, Cloverdale Arena, Newton and North Surrey Sport and Ice Complex. Effective November 20, 2021. Arena public skates now require proof of vaccination for those 5+ under the updated PHO for Gatherings and Events.

Arena Sport User Group utilization for the period of January 23 – February 5, 2022 is summarized below:

| Arena User Group Stats | | | | | | |

COVID-19 Vaccination Clinics

The South Surrey Recreation Centre and Cloverdale Recreation Centre continue to operate as Mass Immunization Clinics. Fraser Health opened the Cloverdale Recreation Centre clinic on January 5, 2022 and expanded the South Surrey Recreation Centre clinic from a community clinic to a mass immunization clinic on January 9, 2022. The South Surrey Recreation Centre Clinic is currently operating 10:45 am – 5:15 pm, 7 days a week. The Cloverdale Recreation Centre Clinic is currently operating 11:00 am-6:00 pm, 7 days a week.

For more information regarding vaccination clinics in Surrey visit: <https://www.fraserhealth.ca>.

Bear Creek Park Rapid Test Pick Up Site

Fraser Health operated a drive through rapid test pick up location at Bear Creek Park from January 13, 2022 through February 1, 2022 and is now closed. The site distributed rapid tests to symptomatic individuals by appointment only.

Park Ambassador Program

The Park Ambassador Program was first introduced in March of 2020 to help keep Surrey's parks safe. Park Ambassadors continue to be the friendly faces in Surrey's destination and sport parks, working closely with Surrey Bylaws, to act as liaison for delivering key messaging to park visitors.

The program has been operating at a much-reduced level since the Province moved to Step 3 as there are no restrictions in place for park spaces. Once the Province moves into Step 4, the Park Ambassador program first established in response to COVID-19 will be concluded. The Park Ambassador program is envisioned to restart in 2022 with significantly different job responsibilities as compared to duties during response to COVID-19. It is envisioned that the future Park Ambassadors will have a wide range of job duties including litter picking, greeting, wayfinding, washroom cleaning, and some bylaw enforcement capabilities, etc.

Surrey Libraries

Surrey Libraries phased reopening of its libraries is summarized below for January 2022.

| <i>Service</i> | <i>Number of Facilities Opened</i> | <i>Daily Average Checkouts</i> | <i>Daily Checkouts as a % of Pre-pandemic checkouts</i> | <i>Daily Visits</i> | <i>Daily Visits as a % of Pre-pandemic visits</i> |
|----------------|------------------------------------|--------------------------------|---|---------------------|---|
| Libraries | 10 | 6,880 | 72% | 3,300 | 45% |

Libraries continue to be used by the community for information and recreational needs, computer access and the use of study space. All 10 branches are currently operating at full-service hours. A summary of programming in January 2022 is provided:

| <i>Adult Programs</i> | <i>Number of Programs</i> | <i>Number of participants</i> |
|-----------------------|---------------------------|-------------------------------|
| Online | 28 | 350 |
| In-person | 4 | 4 |
| Total | 32 | 354 |

| <i>Youth Services Programs</i> | <i>Number of Programs</i> | <i>Number of participants</i> |
|--------------------------------|---------------------------|-------------------------------|
| Online | 26 | 435 |
| In-person | 4 | 57 |
| Total | 30 | 492 |

Programming includes:

- Youth Services online programs: weekly online storytimes (Baby, Toddler, Family, PJ), Book Club (Kids, Preteen), Fun (Afterschool Fun, Artsy Kids), UBC Geering Up, STEM Club, TLC meeting and event, Teen Escape Room, Teen Book Rec Form,
- Youth Services online outreach: FirstSteps, Practically Preschool, DIVERSEcity Teens,
- Adult online programs: Armchair Travel, Library Champions, English Conversation Circle, A/V Club, Family History (Indigenous Research, Eastern European Genealogy-95), Book Clubs (OP, GL, FL, Lit Club, Books+Bev, Seniors, ELL, Book Chat, Audiobook), and
- Adult online outreach: CELPIP Info Session, Welcome Centre Caregivers.

Surrey Fire Service (“SFS”) Response

In 2022 Surrey Fire Service workloads are consistently higher than the period before BC Emergency Health Services COVID changes to medical incident dispatch protocols. The increased growth in service demands since 2021 is related to a general increase in the number medical incidents being assigned by BCEHS for a fire service response.

The SFS response to overdose incidents in 2022 has averaged 8.3 per day, similar to the number in November and December 2021. This equated to 450% of the delivery of life saving Naloxone to overdose patients by Fire First Responders.

Appendix “IV” provides a comparison of incident responses by the SFS each month in 2019, 2020, 2021, and 2022.

Surrey RCMP Response

The Surrey RCMP received more calls for service in the first four months of 2020 as compared to the same period in 2019 (pre-pandemic), and as the pandemic continued, calls for service were slightly below the monthly totals for the rest of the year resulting in 2020 experiencing 0.2% (433) fewer calls than 2019. In 2022 through January, the Surrey RCMP received 227 fewer calls as compared to the same period in 2021, 659 fewer compared to 2020, and approximately 273 fewer calls as compared to the same period in 2019 (pre-pandemic).

Appendix “V” provides a comparison of calls for service to the RCMP each month in 2019, 2020, 2021 and 2022.

Logistics

From the start, to ensure that the City, including the SFS, has adequate cleaning equipment and Personal Protective Equipment (“PPE”) for staff, the EOC has centralized its inventory of these supplies and is monitoring daily consumption rates. A copy of the City’s inventory of critical supplies as of February 9, 2022, is attached as Appendix “VI”.

Beginning in November 2021, the EOC has commenced ordering of rapid antigen test kits to support of the City’s Rapid Testing Program, to test essential staff that have been exposed through a close contact, and a limited a number of test kits have been sold to staff (and will again be sold to staff as the City’s inventory allows for) at cost so that they may complete their own rapid tests at home given the strain on Provincial testing resources. On February 4, 2022, the City announced that staff members would be able to purchase two rapid test kits per person.

Return to Office Plan

The EOC has enacted a Return of Office (“RTO”) plan that ensures the City can continue the process of reintegrating staff back into the workplace in a safe and responsible manner.

The RTO plan was developed based on the following key principles:

- Compliance with all PHOs;
- Health and Safety;
- Work efficiency;
- Promoting a gradual return to normal business operations; and
- Flexibility to make alternate work arrangements, as needed.

Following the directions announced by the Provincial Health Officer on November 7, 2020, the EOC introduced screening of all staff using a COVID-19 symptom check list. Staff are required to complete a short online self-screening form prior to entering their workplace each day. Staff that answer yes to any of the questions on the self-screening form are advised that they are not to enter their workplace and that they will be contacted by their manager with further directions.

Current Staffing Levels

The EOC continues to monitor staffing levels at all civic facilities and on January 5, 2022 adjusted staffing levels (i.e., the number of staff working at facility) from 60% to 40% due to the emergence of the Omicron variant and increase in cases. Since November 29, 2021 there has been 598 cases amongst staff, for a total of 750 cases amongst staff since the start of the pandemic. The RTO plan and safe work protocols in place have been effective to date in minimizing COVID-19 transmission between staff as the vast majority of cases that staff have contracted occurred outside of the workplace. Despite the increase in cases amongst staff, the City’s level of service has not been negatively impacted.

Based on the current reduction in new cases, the EOC is reviewing the merits reinstating staffing levels to 60% in the coming weeks.

Proof of Vaccination Policy

The City's Proof of Vaccination Policy came into effect on January 5, 2022. 3,429, or 96% of, staff have demonstrated that they are fully vaccinated and that 16 staff have indicated that they are partially vaccinated, 55 staff are not vaccinated and 63 staff preferred not to indicate their vaccination status. There is also a limited number of staff who are away on some form of leave (i.e. vacation or maternity) who have yet to provide their proof of vaccination. These staff will be required to provide proof of vaccination at the end of their leave.

Staff, except those who provide support services to the Surrey RCMP, who are not fully vaccinated are required to participate in a rapid testing program and complete regular rapid antigen testing and provide a negative test result before the start of their shift.

On December 17, 2021, local governments across Canada were advised by the RCMP that all local government staff who work directly with the RCMP are required as of January 7, 2022 to be vaccinated and only those who are not vaccinated due to a personal characteristic protected by the *Canada Human Rights Act* or a valid contraindication or deferral to a COVID-19 vaccination as identified by the Provincial Health Officer are eligible to participate in a rapid testing program and complete regular rapid antigen testing and provide a negative test result before the start of their shift. In other words, staff who have elected not to be vaccinated are not eligible to participate in a rapid testing program and continue working directly with the Surrey RCMP.

Updated COVID-19 Symptoms and Close Contact Protocols

The City has updated its COVID-19 Symptoms and Close Contact Protocols in response to the reduced incubation time of the Omicron variant of COVID-19 compared to earlier strains and reduced Provincial requirements for isolation from seven to five days. This update includes a reduction in self-isolation for fully vaccinated staff from seven to five days from the initial onset of symptoms, with return to work permitted following a negative rapid test.

Staff in essential service areas, including Surrey Fire Service, RCMP Support Services, and Engineering Operations will no longer be required to isolate following a COVID-19 exposure if they have no symptoms. Essential staff will be required to take a rapid test on days 3, 4, and 5 following a COVID-19 exposure. Non-essential staff will still be required to isolate for a period of four days following a COVID-19 exposure.

Support for Priority Populations (experiencing housing instability)

The EOC has worked with BC Housing and the Fraser Health Authority to open one arena at North Surrey Recreation Centre ("NSRC") as an Emergency Response Centre ("ERC") to prevent the spread of COVID-19 among people experiencing housing instability during the pandemic. Currently the ERC in the first arena operates at or close to the full capacity of 48 guests. Last winter the EOC also worked with BC Housing to open the second arena at the NSRC as an emergency winter shelter with COVID-19 prevention services. Currently this second arena operates at close to or full capacity of 48 guests in the emergency shelter.

The services provided by Fraser Health at the ERC including COVID-19 testing and wrap-around health care services, opioid agonist treatment and a managed alcohol program. BC Housing will continue to fund Surrey Urban Mission to ensure the ERC and the emergency shelter can serve Surrey's priority population.

On December 24, 2021, an Extreme Weather Response (EWR) shelter was opened in the ERC. Located on the second floor, the EWR shelter provides 30 mats that are available overnight during EWR Alerts. EWR Alerts are called when winter weather conditions pose a risk for the health and safety of people who are unhoused. The EWR shelter is operated by SUMS. Since it opened, the EWR shelter has been full or nearly full every night.

To reduce the number of people in some existing BC Housing funded shelters in Surrey, BC Housing has moved people from shelters to individual motel rooms at The Linda Vista Motel at 6498 King George Boulevard, the Canadian Inn at 6528 King George Boulevard.

It is expected that as the risk for COVID-19 subsides, BC Housing will seek to relocate those sheltered at the Linda Vista Motel and the Canadian Inn to available housing where available, or back to an existing shelter as capacity in these facilities is increased to pre-pandemic occupancy rates. In addition, staff are continuing work with BC Housing and the Province to identify alternate housing options for the guests at the NSRC ERC.

COVID-19 Compliance and Enforcement Team

On March 26, 2020 the Surrey RCMP and the City of Surrey Bylaw Services Division established a joint COVID-19 Compliance & Enforcement Team ("CCET"). The CCET's mandate is to conduct proactive checks to ensure local residents and businesses understand their personal obligations regarding social distancing and self-isolation requirements to stop the spread of COVID-19. The Team's primary mandate is proactive education and gaining voluntary compliance with the directions of the Provincial Health Officer.

CCET continues to proactively reach out to Surrey businesses, faith-based locations, banquet halls, and recovery homes to inform, educate, and prevent contraventions of the public health safety orders. They have also conducted patrols in areas where people continue to congregate, such as parks and playgrounds.

Over the course of the pandemic, the average compliance percentage has varied from a low of 74% during the month of August 2020 to a consistent high of over 95% in the latter half of 2021. It is important to note that compliance inspections as reflected above relate to both the provincial PHO requirements as well as WorkSafe BC and Fraser Health requirements. Only contraventions to the PHO may result in fines and, as per the province, only municipal police officers or health officers are permitted to issue fines. Municipal bylaw enforcement officers across the province are precluded from issuing fines.

While COVID-19 cases have sharply increased over the past several weeks, the CCET has not encountered a significant number of issues with respect to Surrey businesses not complying with PHO requirements. Where non-compliance has been observed, matters ranged from patrons not wearing masks when walking through an establishment to business owners failing to request proof of vaccination. These mainly involved a small number of Surrey restaurants. In these cases, CCET members provided business owners with education on the PHO requirements and no

issues were observed in follow up inspections. The more prevalent cases of non-compliance have occurred with private fitness clubs and dance studios that have remained operational despite the current PHO requiring that these businesses remain closed until January 18, 2022. The CCET in conjunction with Fraser Health has focused on these types of businesses to gain compliance. While no tickets have been issued, businesses owners have been provided warnings that subsequent occurrences will lead to the issuance of fines. These businesses are being closely monitored to ensure compliance.

When a business is found to be non-compliant, CCET members discuss the educational information and requirements (previously provided to these businesses) directly with the establishment owners and/or management to ensure the information is well understood. All businesses, residences and persons not complying to the PHOs may be subject to fines. The CCET has issued a total of 166 fines since late August 2020 including 34 fines issued to businesses, 44 fines issued to private residences; and 88 fines issued to individuals.

Supporting and Informing Residents

The City's COVID-19 webpage, www.surrey.ca/COVID-19, has been a valued source of information for residents and businesses with approximately 314,102 pageviews as of February 7, 2022, with 878 pageviews occurring over the last week. The information on these webpages is updated frequently, and includes important news & updates, COVID-19 community safety tips, services status updates, facility closure and opening notices, online service opportunities, business resources and community resources.

The City's social media accounts including Facebook, Twitter and Instagram continue to be a valued source of information for residents and businesses. Over the past week, the City has used these platforms as part of a renewed effort to encourage residents to follow current regulations and restrictions. Through these platforms, the City reached approximately 135,821 users over the last week.

SUSTAINABILITY CONSIDERATIONS

The City of Surrey Emergency Program, the EOC, and the level of service provisions supports the objectives of the City's Sustainability Charter 2.0. This work relates to Sustainability Charter 2.0 themes of Public Safety. Specifically, the following Desired Outcome ("DO"):

- Emergency Preparedness and Prevention DO6: Surrey has proactive and coordinated emergency prevention measures in place and can effectively deal with emergencies that arise.

CONCLUSION

The COVID-19 pandemic is experiencing a global resurgence (fifth wave) in cases including in British Columbia.

The City as of July 1, 2021 is currently offering its services in line with Step 3 of the BC Restart Plan. As the Province enacts Steps 4 of the BC Restart Plan, the City will enact Step 4 of the Surrey Restart Plan accordingly.
