QUESTIONS AND ANSWERS:

Q1: The addendum states that Surrey wants Zinc coating for corrosion protection but then does not want Poly encasement. The questions remain what happens when the zinc is gone? Has there been soil studies and resistivity tests done on the area? Polyethylene encasement is a known and proven form of corrosion protection zinc is not so proven.

A1: The above noted Quotation is strictly for the Supply and Delivery of Earthquake Resistant Ductile Iron Pipe. Polyethylene encasement will be ordered separately prior to construction.
