The Contractor shall assign to the City any warranty or service guarantee offered by a third party manufacturer or supplier of the Goods. Notwithstanding this assignment, if at any time up to one year from the date of delivery or installation (if applicable) the City determines the Goods or any part do not conform to these warranties, the City shall notify the Contractor within a reasonable time after such discovery, and the Contractor shall then promptly correct such nonconformity at the Contractor's expense. - 12.2 The indemnities described in Sections 11.2, 12.1 and 18.3 will survive the termination or completion of this Agreement and, notwithstanding such termination or completion, will continue in full force and effect for the benefit of the Indemnitees.
- 12.3 The Contractor will, without limiting its obligations or liabilities and at its own expense, provide and maintain throughout this Agreement the following insurances in forms and amounts acceptable to the City from insurers licensed to conduct business in Canada:

The Contractor will be responsible for deductible amounts under the insurance policies. All of the Contractor's insurance policies will be primary and not require the sharing of any loss by the City or any insurer of the City.
- 12.5 The Contractor acknowledges that any requirement by the City as to the amount of coverage under any policy of insurance will not constitute a representation by the City that the amount required is adequate and the Contractor acknowledges and agrees that the Contractor is solely responsible for obtaining and maintaining policies of insurance in adequate amounts. The insurance policy coverage limits shall not be construed as relieving the Contractor from responsibility for any amounts which may exceed these limits, for which the Contractor may be legally liable.

20. FUEL EMISSIONS DATA

- 20.1 In 2007, the City of Surrey signed the BC Climate Action Charter, a voluntary agreement that commits the City to be carbon neutral in its corporate operations (for more information go to <http://www.livesmartbc.ca/community/charter.html>). The City is also committed to reducing corporate greenhouse gas (GHG) emissions by 20% by 2020.
- 20.2 Following on these commitments, the City of Surrey tracks its corporate energy use and greenhouse gas (GHG) emissions annually within traditional service areas. Where the City has a contractual arrangement to deliver these traditional services as defined under the BC Climate Action Charter, some of the GHG emissions from the services need to be included as part of the annual corporate emissions inventory.

20.3 Commencing January 1, 2013, the City will require all service providers to communicate the quantity of fuel (gasoline, diesel, natural gas, propane and bio-fuel blends) used to operate vehicles, equipment and machinery as part of the delivery of the services described in the contract and to provide this data to the City at the earlier of termination of the assignment or at the end of each calendar year.

20.4 Data provided should include the following (see sample format):

- Type of fuel consumed (gasoline, diesel, natural gas, propane and bio-fuel blends); and
- Litres of fuel consumed in relation to the service delivered under the contract
 - Although actual fuel volumes are preferred, the City recognizes it may be difficult to assign fuel use to any particular contract. In these cases, apportioning fuel use for equivalent services based on contract dollar value, total service hours, or some other logical method is acceptable. If fuel consumption is prorated and/or estimated, the method of proration and/or estimation must be noted.

Sample Report:	
P.O. Number	567932
Date Range	March 1 – September 15
Gasoline (litres)	1,200
Diesel (litres)	4,500
Prorated Based on	Service hours

The City can provide direction, if necessary, to calculate this information

The City may, at its discretion, give preference to equipment that meets higher emission standards.

This Agreement supersedes and cancels all previous agreements between the parties relating to the Goods and Services.

29.2 In the event that the Contractor issues an invoice, packing slip, sales receipt, or any like document to the City, the City accepts the document on the express condition that any terms and conditions in it which constitute terms and conditions which are in addition to or which establish conflicting terms and conditions to those set out in this Agreement are expressly rejected by the City.

APPENDIX 3
CONTRACTOR HEALTH & SAFETY EXPECTATIONS
RESPONSIBILITY OF CONTRACTOR(S)

The City strives to maintain a safe work environment for employees and contractors and insists upon the enforcement of safe practices and procedures in all premises and in all work activities. It is essential that all contractors and their employees and sub-contractor(s) perform in the same manner. It is every employers and contractors responsibility to ensure that staff and public are protected from workplace hazards.

As a Contractor to the City of Surrey, you are expected to conform to the requirements of the Workers' Compensation Act, the WCB Occupational Health and Safety Regulation and to all federal, provincial and local laws and regulations. The City of Surrey Building Owner, Project Manager, and the Manager, Occupational Health & Safety or designate have the authority to order an unsafe act to cease or to have an unsafe piece of equipment removed from the premises or, in extreme situations, to shut down a job entirely. Any City Employee that observes a safety infraction by a contractor performing work for the City should bring it to the attention of a manager immediately or Occupational Health & Safety (604-591-4131).

The following information is provided as typical City requirements, but does not relieve the Contractor from complying with all applicable local, provincial and federal laws, regulations and bylaws.

PERSONNEL

1. You are expected to inform your employees of any potential hazard in the workplace and advise of appropriate action to be taken should a hazard be found or a fire or accident occur.
2. Contractors will restrict persons invited on the premises to employees only. No families or friends are permitted.
3. The Contractor will advise the City of any on-site accidents involving the Contractor's employees, or injuries to others caused by the Contractor's business.

SAFETY MANAGEMENT SYSTEM

1. Contractors will ensure their employees utilize proper safety equipment and clothing as required for job site activities.
2. Contractors must follow and have on site proper written safe work procedures for hazardous work, e.g. Fall protection, confined space entry, hotwork, lockout, excavations and shoring, traffic management, etc.
3. Contractor must Identify workplace risk and implement suitable controls.
4. Contractor must provide safety training and education to staff and have training records available for review.
5. Contractor must have a health & safety program for its workers and sub-contractors
6. Contractor will provide appropriate First-Aid coverage for their workers and subcontractors.
7. Contractor must forward a weekly work task list prior to work commencement.
8. The qualified safety coordinator must participate in the City OHS Orientation or attend the Prime Contractor's Orientation.

WORK AREAS –City Facilities

No work by contractors shall occur in any area without prior consent of the Department Representative, or his designated representative. Work during normal business hours of the City shall not create undue noise, smells or otherwise unduly disturb the work of City staff or the public. If an activity requires that a disturbance is likely, the contractor shall whenever possible only do that work outside normal business hours.

All activities that create a hazard (i.e. work from a ladder, removal of a floor tile, emission of VOC's, etc.) to persons outside the contractor's supervision shall have warning devices, delineation or barriers, sealed spaces, etc. as would normally be required to protect any person from that hazard.

SAFETY ATTITUDE

Your safety record and attitude are important criteria used to judge your qualification for future bidding on solicitations with the City.

You can help ensure employee safety and your eligibility for future business with the City if you exhibit and practice a "Safe Work - Safe City" attitude.

The City is concerned about the health, safety and wellbeing of all employees and contractors. It is essential we maintain a healthy, safe and productive work environment.

All Employees & Contractors:

It is everyone responsibility to:

- ❖ know and comply with WCB regulations and
- ❖ follow established safe work procedures
- ❖ immediately report any work related injury to his/her supervisor; and to the city representative
- ❖ not remain on the work site while his/her ability to work is in any way impaired
- ❖ report unsafe acts and conditions to their supervisor
- ❖ correct unsafe conditions immediately whenever it is possible to do so
- ❖ take reasonable care to protect your health & safety and the health and safety of other persons who may be affected by your act's or omissions at work

An employee must refuse to work if continuing to do so would endanger the health and safety of the employee, fellow employees or others. The worker must immediately report the circumstances of the unsafe condition to his or her supervisor or manager. If the unsafe condition is not remedied or the issue is not resolved the Manager, Occupational Health & Safety must be contacted.

A common sense approach usually resolves the issue.
