Q.1. With respect to the City's intent to make the Intranet mobile compatible, can the City confirm if it will own the configuration of the infrastructure to make all three (3) environments remotely accessible by internet without VPN or is the expectation that this will be performed by the vendor?

A.1. **The standard approach is for the City's Technical Leads and Subject Matter Experts to perform the installation and configuration of our environments with the Contractor performing an advisory role. This would also apply to remote access.**
