

## Inspections Schedule – Calendar View

In the existing ESC inspection portal, many users identified that it was difficult to visualize when inspections were to occur when dealing with multiple permits spanning numerous rainfall catchment areas.

To assist ESC Supervisors, a calendar view has been added to the new user dashboard to help clarify both when inspections are required, based on weekly view, as well as to group/flag inspections by SRE’s and Regular inspections. Below is an example of how the calendar will appear when dealing with both multiple permits as well as showing an example of the scenario when there is a combination of SRE and regular inspections,

### Default Calendar View (weekly)

Another great feature of this ability to click on a specific day is that it also clarifies the associated inspection window. While the system flags the SID as a specific date, there is a valid inspection/reporting window around the specified date. Please refer to Section 6.5 of the existing [User Manual for the Online ESC Supervisor Reporting System](#) for clarification about the inspection window.
