Building the Next Metropolitan Centre

Strategic Actions for Economic Investment
The City of Surrey Economic Strategy 2017-2027
Pursuing a progressive metropolitan transformation agenda is a complex and collaborative process involving significant and strategic input from Surrey’s residents, all levels of government, and the private sector.

The City of Surrey’s economic vision has evolved over two Economic Investment Action Plans initiated almost a decade ago. These plans sparked major investment initiatives, including:

- the multi-million dollar, multi-year **Build Surrey** program, which is establishing Surrey as an attractive business destination,
- the relocation of Surrey City Hall and Surrey Central Library to Surrey City Centre, and
- supported the new Civic Hotel and Residences project, which will open in 2017 as the tallest tower south of the Fraser River.

Five key priority sectors, including health technology, clean technology, agri-innovation, advanced manufacturing, and creative arts, were identified to support the diversification of Surrey’s economy, as well as to introduce emerging industries into the existing employment landscape.

This economic strategy builds on the previous Economic Investment Action Plans to create a strong foundation in four priority areas: attracting investment, growing Surrey’s innovation economy, building distinct & competitive business communities, and creating jobs & developing our workforce. Specific strategies and objectives in each of these focus areas have been informed by in-depth consultation with business leaders from across North America. In addition, a number of targeted focus groups and surveys were initiated to gain insights into requirements from the local business community.

**An Economic Action Plan to Transform a Metropolitan Centre**

This strategy is the culmination of 2 years’ worth of research and approximately $1.0 Million in partnership funding to engage leading market research and economics researchers.

An evidence-based approach was used to consolidate the findings from a number of economic visioning processes, and to understand what it will take to build Surrey into a metropolitan centre for the region. This process has stimulated new ideas, forged new partnerships, and reinforced the City of Surrey’s strong commitment to a secure, resilient and sustainable future.

Stakeholder consultations and key insights from around the world included:

- 800+ conversations with local businesses over the past 10 years
- 200+ in-depth consultations with local and international business leaders
- 30+ comparable city models reviewed, and interviews with municipal practitioners
This economic action plan aligns in significant ways with the BC Jobs Plan, #BCTECH Strategy, and the Government of Canada’s Innovation Agenda. Many of the investments and opportunities outlined here are the result of efforts by the City of Surrey to engage and inform senior levels of government about Surrey’s needs, challenges and opportunities.

This Plan also aligns with key civic policies including the award-winning Sustainability Charter 2.0, Surrey’s Official Community Plan, the Smart Surrey Strategy and the recently launched Public Safety Strategy – all of which are evidence of Surrey’s commitment to integrated planning through a comprehensive strategy to build and support vibrant communities across the City.
Strategic Actions

The following section outlines the strategic actions that will help us achieve our vision and objectives.

**Vision:** The City of Surrey will become the regional nexus for commerce and a nationally recognized centre for innovation within the next decade.

**Mission:** Our mission is to create a vibrant business ecosystem that catalyzes the development of jobs, investment, entrepreneurship and innovation within the City of Surrey in order to facilitate metropolitan transformation.

Priorities, Objectives and Strategies
