

CRAFT: SUN CATCHER

Source: <https://babbleddabledo.com/art-for-kids-cosmic-suncatchers/>

Supplies:

Lots of white glue
Food coloring
Toothpicks
Plastic lids (from tubs of yogurt, hummus, etc.)
Single holepunch
String

STEP 1

Pour generous amount of glue into a plastic lid – swish it around to fill the inner surface. Don't fill the entire lid with glue- we want to ensure the glue is see-through once dry.

STEP 2

Add few drops of food coloring and swirl with toothpick. Don't overdue – the color will expand and get muddy when dry if too much color is added

STEP 3

- Leave to dry for a couple of days
- Once dry, carefully peel glue from lid. Use a holepunch to add string to hang in window.
