QUESTIONS AND ANSWERS:

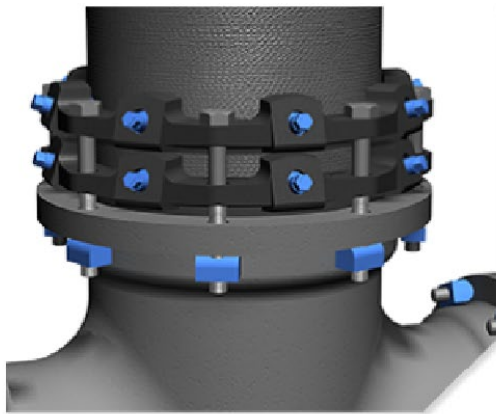

Q.1 300mm Ductile Iron Pipe, Zinc Coated Class 350 800 metres Is this to be TYTON non-restrained or TR FLEX self-restrained pipe? If it is to be TYTON non-restrained do you want to add a line for PIPE TO PIPE restrainers?

A.1 All of the pipe is non restrained, zinc coated pipe, tyton pop in style.

Q.2 On line item "10." of the materials list it calls for a "300mm Single restrained couplers". I understand what a restrained coupler is, but I do not understand by what you mean by a "Single" restrained coupler.

A.2 Single restrained coupler is for non seismic areas, a Tandem restrained coupler has two restraining rings on each side. Double restrained coupler see photos below for additional information.
